***Drawings***

1. Figure 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

2. The disclosure is objected to because of the following informalities: the brief description of the drawings does not list figures 3A and 3B separately.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2631

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ochi et al (WO98/52354). Ochi et al (US 6,556,776) will be used as a translation of Ochi et al (WO98/52354).

Regarding claims 1 and 3, Ochi discloses the digital signal recording apparatus in figure 1. The recording and reproducing unit 3 examines a signal recorded on the recording medium to distinguish between an analog recording method and a digital recording method and outputs a recording method identification signal from an output terminal 10 (column 4, lines 61-65). The recording apparatus records and reproduces digital video and audio information served through satellite broadcasting (column 1, lines 8-14).

Regarding claim 2, the recording and reproducing unit 3 is shown in figure 1.

Regarding claims 4 and 8, the signal is input from a digital broadcast or from a recording and reproducing unit 3. One of these signals is passed through switch 4 to the TV monitor 11 (figure 1).

Regarding claims 5-7, unit 3 outputs a recording method identification signal from output terminal 10 (column 4, lines 61-65).
